

## Subject Area: Design and Technology

Curriculum drivers: The curriculum is underpinned by the school's **Curriculum Driver**: Communication alongside our school values: Confidence, Compassion, Creativity and Curiosity.

The spiritual, moral, social and cultural development of our pupils and their understanding of the core values of our society are woven through the curriculum. The curriculum also consolidates the fundamental British values of democracy, the rule of law, individual liberty, and mutual respect and tolerance of those with different faiths and beliefs.

The knowledge and skills children learn must be co-ordinated and coherent. In order to achieve this in our curriculum, we have identified the key concepts or overarching ideas within each subject. To enable the children to access them, we call these the 'Big Ideas'. In Design and Technology these are: design, structures and mechanisms, cooking and nutrition and textiles.

### EYFS

Design and Technology Objectives most closely linked to learning within the EYFS Framework (2021) and Development Matters come from;

#### Expressive Arts and Design (EAD)

The development of children's artistic and cultural awareness supports their imagination and creativity. It is important that children have regular opportunities to engage with the arts, enabling them to explore and play with a wide range of media and materials.

#### Physical Development (PD)

Gross and fine motor experiences development incrementally through early childhood. Gross motor skills provide the foundation for developing healthy bodies and social and emotional well-being. Fine motor control and precision helps with hand-eye co-ordination which is linked to early literacy. Children should be provided with opportunities to develop their core strength, stability, balance spatial awareness, co-ordination and agility through both indoor and outdoor games and opportunities. Additionally, opportunities to explore small world activities, puzzles, arts and craft will allow children to develop proficiency, control and confidence.

### KS1 National Curriculum Aims

from the Design and Technology programmes of study: key stages 1 and 2 National curriculum in England;

- develop the creative, technical and practical expertise needed to perform everyday
- build and apply a repertoire of knowledge, understanding and skills in order to design and make high-quality prototypes and products for a wide range of users
- critique, evaluate and test their ideas and products and the work of others
- understand and apply the principles of nutrition and learn how to cook.

#### KS1 Pupils should be taught about:

Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts [for example, the home and school, gardens and playgrounds, the local community, industry and the wider environment].

When designing and making, pupils should be taught to:

- Design
- design purposeful, functional, appealing products for themselves and other users based on design criteria
  - generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology

- Make
- select from and use a range of tools and equipment to perform practical tasks [for example, cutting, shaping, joining and finishing]
  - select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics

- Evaluate
- explore and evaluate a range of existing products
  - evaluate their ideas and products against design criteria

- Technical knowledge
- build structures, exploring how they can be made stronger, stiffer and more stable
  - explore and use mechanisms [for example, levers, sliders, wheels and axles], in their products.

St Clement's & St John's CE Infant School  
Skills Progression - Long Term Plan

Cooking and nutrition

- use the basic principles of a healthy and varied diet to prepare dishes
- understand where food comes from.

KS1 Art curriculum 'Big ideas'.

Design

Looking at and evaluating existing designs and using this to inform our own thoughts and ideas. We translate our thoughts and ideas into our own designs.

Structures and mechanisms

How materials can be joined to create structures and moving parts.

Cooking and nutrition

How to combine ingredients to make food and drink. Knowing which foods are healthier choices.

Textiles

How materials are joined to form usable products.

Taught through..

Wheels and axels  
Making a moving character

Taught through..

A balanced diet - wrap making  
Smoothie making

Taught through..

Making a pouch and bunting  
Puppets

	EYFS	Year 1	Year 2
Design	<p>Teach children to...</p> <ul style="list-style-type: none"> <li>- choose and use different materials for different effects e.g. Paintbrushes, junk modelling. <b>COMMUNICATION, CREATIVITY</b></li> </ul>	<p>Teach children to...</p> <ul style="list-style-type: none"> <li>- plan what they are making and state who it is for <b>COMMUNICAITON, CREATIVITY</b></li> <li>- create a template using their design</li> <li>- explain their drawn designs <b>COMMUNICATION</b></li> <li>- test ideas by exploring materials, components and construction kits</li> <li>- label their design with appropriate vocabulary</li> <li>- make a choice as to what ingredients they use and explain their choices <b>COMMUNICATION, CONFIDENCE</b></li> </ul>	<p>Teach children to...</p> <ul style="list-style-type: none"> <li>- design a product that meets given criteria <b>CREATIVITY</b></li> <li>- explain how their product will be suitable for the intended user</li> <li>- use knowledge of existing products to help generate design ideas</li> <li>- communicate and model their ideas using a mock-up</li> <li>- label their designs with technical vocabulary <b>COMMUNICATION</b></li> <li>- identify simple levers and sliders in moving books/products</li> <li>- consider and review food combinations to design a finished product (e.g. sandwich) <b>CONFIDENCE, CREATIVITY</b></li> </ul>
